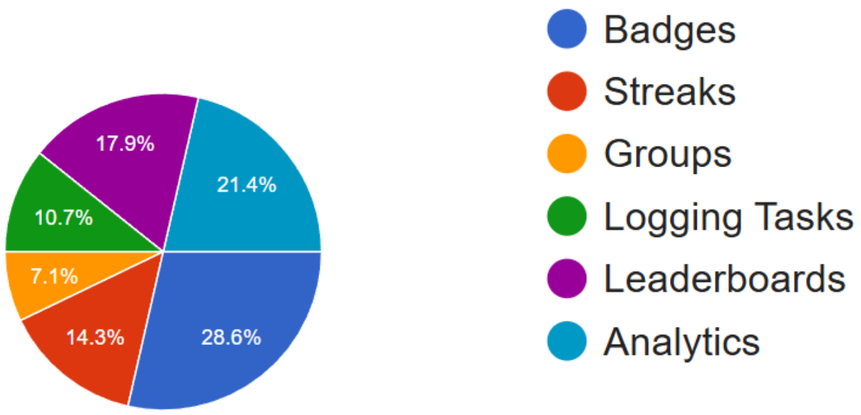
EVALUATION

Assessing how successful our user experience is.

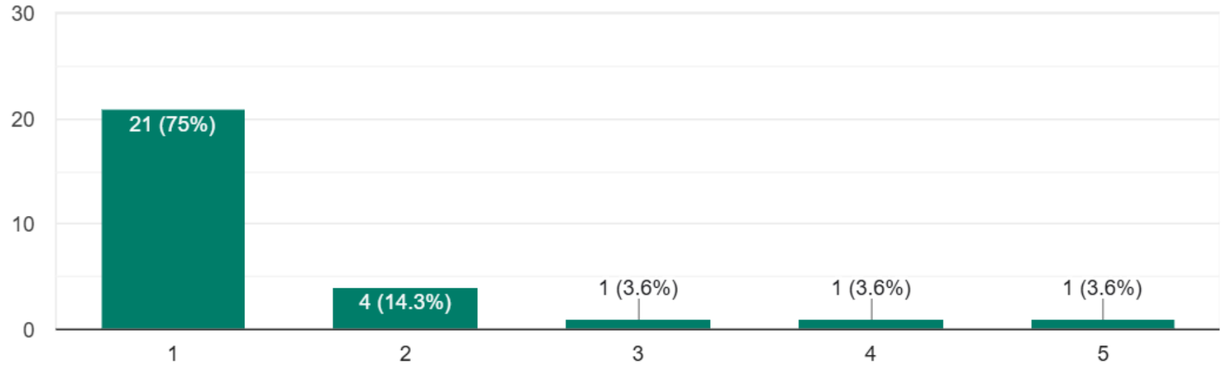
What is your favourite feature of the website?

28 responses



How many bugs did you encounter on the website?

28 responses



- **75% of users used mobile devices**
- **75% of users report finding no bugs, and 14% reported finding minimal bugs**

"There is no validation on Travel, I entered a really large number and I ended up on -2144978554 points"

- **Fixed limitations on Travel page**

"I didn't realize 'Menu' was a button and not simply just a title/header for the page until I accidentally clicked on it." (Mobile user)

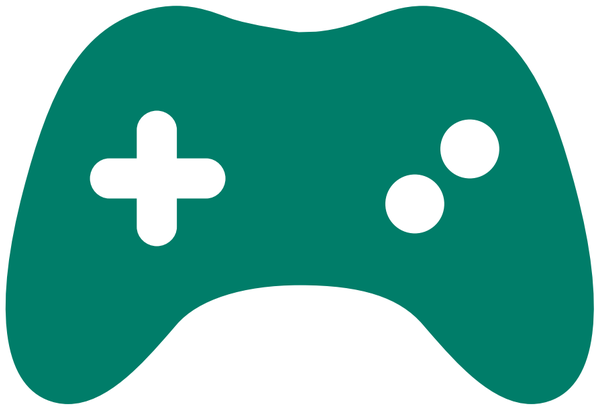
- **Added icons to mobile interface**

Future Work

EXPANDING INTERACTION

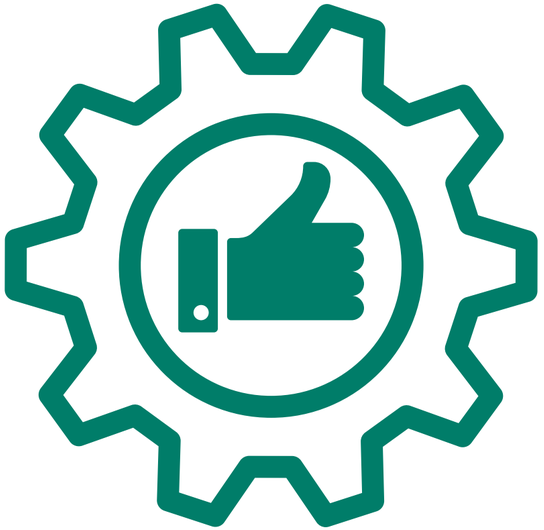
Expand on group interactions to foster community engagement.
Eg. Messages, roles, group challenges

FURTHER GAMIFICATION



Further gamifying the system to make it more fun, improving user retention.
Eg. Avatar customisation, progression

POLISHING



Polishing the features and the layouts of the website will help improve user navigation and understanding.
