Scrum Boards

SPRINT ONE SCRUM BOARD: https://github.com/users/Blobby1267/projects/1
Our Sprint One scrum boards were majoritively done on Google docs, and can be found at the bottom of this document.

SPRINT TWO SCRUM BOARD: https://github.com/users/Blobby1267/projects/2

Sprint Planning Board One - [20-01-26]

For our first sprint we will have users and accounts, where users can log tasks and accumulate points which will show on a leaderboard, there will be moderator accounts which can approve/disprove submissions for moderated tasks.

Priority of task determined by colour of User Story. *Red = High*, *Amber = Medium*, *Green = Low*

User Stories	Acceptance Criteria	To Do	Testing	Done

As a user, I want to sign up/sign in easily with 'forget your password' option.
 	
Points : 5
Priority : 1
	• Saves user information
	  ○ Passwords
	  ○ Usernames
	  ○ Emails
	  ○ Phone Number
	• Allows user log in with their (username and email) AND password
	• If user forgets password a recovery email is sent so user can log into their email and reset password
	• User Login UI
		Basic Website
		
		Database
		
		Hash function
		
		Input validation
		
		Checking against database
		
		Creating UI
		
		Forgot password (High risk, hard to implement)
			Sign up/sign in button works. Take user to a different page.
			
			"Forgot password" takes user to a different page.
			
			User can create account with their email and password. Confirm password, and check if both match.
			
			Check hash function works as intended.
				Yes

As a user, I want to see the challenges I can do and the number of points for each. **Points : 3** **Priority : 1**	• Challenge board • Point worth • Order challenges	Creating UI Update challenges dashboard List of challenges	Challenges are displayed with each number of points on the side. User is able to choose a challenge, add it to their challenges. The user is able to order the challenges by how many points.	Yes

As a user, I want to easily see the leaderboard and my ranking. **Points : 3** **Priority : 1**	• Leaderboard • Rank system by point worth • Awarding points	Leaderboard UI SQL query for top players Filter system for top 10 players (look at 10 highest scores in DB) Create second table for top 10 players, updated each day	Users are able to access the leaderboard. Users are able to search for their name/ID/number to find themselves on the leaderboard. There is a filter button that a user can press. Filter by points DESC and ASCEND.	Yes (Improve in Sprint 2)
As a moderator, I want a specific and clear space so that I can easily approve/disprove evidence. **Points : 13** **Priority : 2**	• Moderator area • See submissions • Approve/Disprove Submissions • Access evidence on submission	Checking UI Sending image (image ID) Storing images Pull images to admin approve / disapprove Give user points	Moderators can access a private page (no users). Button to approve the evidence. Button to reject the evidence, with a box to put reason.	Yes
As a user, I want the submission process to be clear and know the number of points I will get from the challenge done. **Points : 5** **Priority : 2**	• Tasks worth points • Submission button	Points displayed for tasks Point calculations displayed for travel tracker	Users can access a description or page of the challenge. There is a submission button and the user is able to click it. Can only click submit if they have done the submission requirements.	Yes

As a moderator, I want to have a specific tab to easily be able to create/end challenges and view analytics of each challenge. **Points : 8** **Priority : 2**	• Analytics dashboard on challenges • Moderator create challenges • Moderator end challenges	User role based webpages Challenge data submission form	Moderators can access a specific page. There are text boxes to put the information of the challenges. Access live challenges and have a delete button.	Yes *(Analytics pushed into Sprint 2)*
As a user, I want to easily be able join/create groups/societies with a code for only members of a specific society to be able to join. ***Points : 8*** ***Priority: 3***	• *Group system* • *Unique code for group* • *Remove people from group* • *Invite people to group by email / username*	Sprint 2	Sprint 2	Sprint 2
As a user, I want to know what badges I can receive and easily see the badges of others. ***Points : 3*** ***Priority : 3***	• *List of badges, criteria to achieve* • *Badges on user profile* • *Claim badges when hit criteria*	Sprint 2	Sprint 2	Sprint 2

Sprint Planning Board Two - [26-02-26]

This sprint focuses on polishing and gamifying the MVP, adding badges, streaks, groups and analytics. Alongside this, further security measures and polishing is added such as mobile friendly layout.

User Stories	Acceptance Criteria	To Do	Testing	Done
All users see carbon emission reduction dashboard/analytics **Points: 8** **Priority: 2**	• Analytics dashboard on challenges • At least 6 dashboard views across the system (e.g., weekly CO2e, action breakdown by category, group leaderboard, verification	Analytics UI HTML/CSS [PHOEBE] Analytics generator java [BEN/MARKO]	Challenge tab appears only on the moderator accounts, and not on the regular accounts.	

	rate). ● At least 2 views must include uncertainty or caveats (e.g., ranges, disclaimers, confidence levels). ● Users must be able to filter by date range and category	Analytics graph display [BEN/MARKO]	Test HTML tags appearing with the moderator. Test filtering feature. Probably a method that takes in a string and returns a list of challenges based on the string.	
As a user, I want to easily be able join/create groups/societies with a code for only members of a specific society to be able to join. **Points : 8** **Priority: 1**	● Group system ● Unique code for group ● Remove people from group ● Invite people to group by email / username	Groups UI HTML/CSS [PHOEBE, MADI & ZARREEN] Groups Java code [BEN/MARKO]	Test uniqueness of the code being created. EDGE: Users are able to join many groups and distinguish between them. Test users can access the group tab.	
As a user, I want to know what badges I can receive and easily see the badges of others. **Points : 5** **Priority : 3**	● List of badges, criteria to achieve ● Badges on user profile ● Claim badges when hit criteria IF TIME: Profile pop up for badges	Badge Tab HTML/CSS [PHOEBE] Badge Designs [MADI & ZARREEN] Badges Table [JAI] Badges java code [JAI] Moderator page to create	Test badges showing up after completing the challenge. Images are shown for the badges and are able to be clicked. Users are not able to get more than one of	

		badges [BEN/MARKO] Display badges on groups and leaderboards [BEN/MARKO]	the same badge. (Test database/user class)	
As a user, I want to see my streak and others' streak so that I can encourage members of my groups. **Points: 3** **Priority:2**		Streak attribute [JAI] Groups streaks display [BEN/MARKO] Streaks functionalities [BEN/MARKO]		
As a developer, I want to increase security on the website so that the laws are followed and for users' trust. **Points: 8** **Priority: 2**	● ● Minimum of 8 characters for password ● SQL injections ● Usernames/group names not allowed to be exactly the same ● Evidence being automatically deleted after 3 months.	Legal docs [ZARREEN] Security systems [BEN/MARKO]		
As a developer, I want to ensure that the website is ethical and it's clear to users about important information so that everything is fair and secure. **Points: 1** **Priority:3**	● Link to legal document ● Statements about what is acceptable for evidence and group/user names. ● Text box for decision reason of moderators ● Explanation for the number of carbon saved for each task in the drop-down	Ethical Docs [ZARREEN]		
As a user, I want a profile tab to see all my actions, total points and approval of evidence so that I don't have to navigate through tabs and do calculations. **Points: 5** **Priority:1**		User record [BEN/MARKO]		*Profile HTML/CSS [Phoebe]*

Sprint One Scrum Boards (Also on Github)

****Our Sprint Two Scrum Boards are solely migrated to Github, please see the links at the top of this document.****

The following pages contain our scrum boards from each week, new tasks that were not originally planned are written in green, and tasks we have determined were unnecessary or should be pushed to sprint 2 are written in red.

Once an item was marked as 'Done' we removed it from the scrum board the following week to keep it cleaner and easier to read.
